Message from the Board of Directors

The directors are pleased to announce the unaudited Group and Company results for the six-month period ended 30 June 2025.

Business Performance

Premium income continues to grow across the Life and General insurance segments, however an increase in the volume of motor and medical claims in the general business has negatively impacted the overall net insurance result and earnings. Higher group risk claims and a strengthening of the reserving basis also impacted on the insurance service result in the life insurance business. This was partially offset by higher investment income. Expense control within the Group remains good. Basic earnings per share from continuing operations at KShs 0.80 are consequently 30% lower.

The lower interest rate trend in Kenya is reflecting the market's perception of an improving economic outlook and inflation remains below the 7.5% stated limit. Further improvements in perceived country risk are also evident through the impacts of an ongoing tight monetary policy and positive GDP growth expectations. However, the consumer pressure on disposable income, credit constraints, fiscal pressure, and climate change risks are reflective of ongoing challenges and higher uncertainty remains.

The business expects to launch new, fully digital life insurance solutions during the second half of 2025, which will add positively to customer experience and improve market positioning.

Discontinued operations

The sale of Heritage Insurance Tanzania (HIT) was completed on 4 April 2025 and has been deconsolidated. The Group's share of HIT IFRS Net Asset Value (NAV) at the effective date of sale was KShs 520 million. Total proceeds net of legal fees and capital gains taxation was KShs 492 million, resulting in a marginal commercial deficit on sale of KShs 28 million . The loss on discontinued operations as reflected in the statement of comprehensive income includes a KShs 217 million loss accounting item. This pertains to the past HIT cumulative translation currency differences included in the separate Foreign Currency Translation Reserve (FCTR) which IFRS dictates must be "recycled" into "loss from discontinued operations" on deconsolidation. This is not an additional cash flow loss at date of sale, as these translation losses have previously been accounted for and reflected in the Group's net asset value.

The comparative information for June 2024 has been represented to reflect the financial results of HIT as discontinued operations.

Prospects

Considering the ongoing weak consumer environment and relatively uncertain investment markets, the Board remains cautious around expectations of high new business growth. The immediate focus on margin improvement and capital efficiency should continue to reflect in improving operational key metrics.

All Group entities remain well-capitalised, exceeding both regulatory and internal capital targets. This provides a solid foundation for continued financial strength and strategic agility.

Interim dividend

The Directors have not recommended an interim dividend for the period.
